

WHY SHOULD WE DEEP-CLEAN OUR BUILDINGS VENTILATION SYSTEM?

THE BENEFITS OF DEEP-CLEANING INCLUDE:

- ▶ The removal of potential risks from the system including flammable lint, dirt, dust and other fibrous build-up.
- ▶ For the wellbeing of residents and guests, as well as repeat bookings.
- ▶ To reduce odour build-up and overheating in personal toilet, bathroom and ensuite areas.
- ▶ To reduce overheating within laundry areas.
- ▶ The removal of build-up to assist in the prevention of mould and microbial content in the system.
- ▶ The opportunity to modernise your system and replace aged/damaged system components such as air vents and control dampers.
- ▶ Reduce loads on roof exhaust fans for improved operation and longevity.

THE BENEFITS OF DEEP-CLEANING YOUR BUILDINGS VENTILATION SYSTEMS

SAFEAIR

ENSURING A SAFE, HEALTHY AND COMFORTABLE INDOOR ENVIRONMENT EXTENDS BEYOND MERE CLEANLINESS; IT INVOLVES A COMPREHENSIVE APPROACH THAT INCLUDES THE OFTEN 'OUT OF SIGHT, OUT OF MIND' ASPECTS OF VENTILATION SYSTEM MAINTENANCE.

The benefits of regularly cleaning your building's ventilation system are multifaceted, contributing not only to the overall well-being of occupants but also to the longevity and efficiency of the system and the building.

From enhancing indoor air quality to mitigating potential health risks, a well-maintained ventilation system is a cornerstone for creating a comfortable living or working space that promotes both physical and environmental wellness.

Discover the positive impact a planned maintenance program can have on the health, safety and comfort of residents and guests, along with the sustainability of your ventilation system into the future.
