

CAPABILITY STATEMENT

Company Overview

Australian Asset Compliance is a Queensland-based company specialising in Height Safety System Inspections & Re-certifications.

Having a combined total of over 20 years of experience in the industry, we have proven ourselves to be experts in the field. Using our in-depth knowledge and understanding of the Australian Standards along with industry-leading software, we aim to become lifelong partners with all of our clients across a broad range of industries such as Aged Care, Health, Education, Government, Retail, and Manufacturing.

At Australian Asset Compliance, integrity & and transparency are two of the most important core values that lead our team. Proactive communication of updates & and issues is a priority for our team to maintain long-term relationships and reputation.

Capabilities

Australian Asset Compliance works with many clients with varying size projects all over Queensland. Ranging from single building projects to larger sites with over 50 buildings, our service is agile and responsive whilst ensuring the compliance needs of our customers are met. Safety is a core driver of our performance, and we commit to a high standard in relation to this. We have the flexible ability to quickly address any updates or changes that arise, adapting to suit specific documentation and procedure guidelines of our clients.

With a small and nimble team, we provide agile service that's personalised to each organisation's needs and by taking on board client feedback & continuously monitoring our internal processes, we are always improving and adding value for our customers.

Our Experience and Expertise

Some of our larger customers include Brisbane Markets Limited, Hyne Timber, Knight Frank, Honeywell, Colliers, JBS Foods Australia, BlueCare, Stockland, Retail First and Queensland Health.

Two of our largest projects each year involve inspecting & re-certifying all of the Height Safety & Fall Protection Systems at the Brisbane Markets in Rocklea, QLD and the Queensland Cultural Centre. With 34 buildings and over 1200qty assets, Brisbane Markets is one of our largest that we currently undertake. The Queensland Cultural Centre has 800qty assets across 7 buildings.

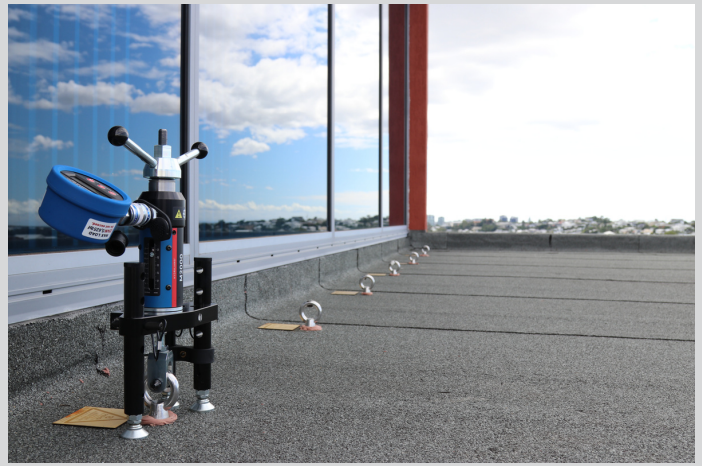

Our company is set up on many of the industry's contractor portals including Avetta, CM3, Rapid Global and more.

Safety and Quality

Each Australian Asset Compliance project is undertaken in accordance with our OHS, Environmental & Quality Policies along with our site-specific SWMS documentation. Incapsulated in our site-specific SWMS is a risk assessment matrix to manage risks for works completed onsite. Prior to starting a project, the conditions are evaluated with any site-specific risks being highlighted and reviewed with control measures being put in place accordingly.

We utilise the best software in the industry to complete our reports. By collating information while onsite we are able to provide extensive detail on each system we inspect. We have checklists in place ensuring a uniform, un-biased and balanced approach while completing every inspection in view of providing a completely transparent report for our client.
