

ABOUT US

Backflow Testing Co. is your trusted partner in backflow prevention device testing in Brisbane. With over 13 years' of dedicated service, we are seasoned backflow plumbers committed to ensuring the safety, compliance, and efficiency of backflow prevention systems, safeguarding the potable drinking water of South East Queensland.

Backflow Testing Co. specialises in the meticulous testing of backflow prevention devices across residential, commercial, and industrial properties. Our expertise ensures that your backflow devices function optimally, meeting all regulatory standards within statutory timeframes.

CORE COMPETENCIES

Our core business is Backflow and Thermostatic Mixing Valve (TMV) testing and certification. We work closely with other plumbing companies to ensure there is no conflict of interest between our services and the general maintenance provided by other contractors.

Due to the lower overheads we can offer extremely competitive annual fixed cost rates.

OUR SERVICES

Backflow Prevention Testing:

- RPZD – Reduced Pressure Zone Device
